

Q-Band Lens Horn Antenna

33 to 50 GHz, WR22, 30 dBi Gain

DESCRIPTION

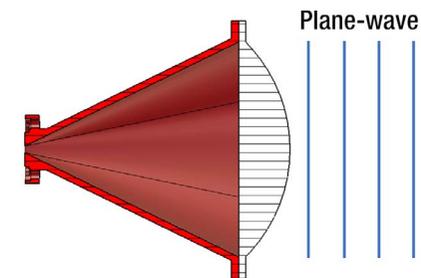

Anteral's Lens Horn Antennas are conical horn antennas with a **plano-convex** Teflon (PTFE) lens added in the aperture, in order to apply phase correction and achieve high gain, low VSWR and low side-lobes, with minimum size.

The LHA-30-WR22 model operates at the Q-band between 33 and 50 GHz with 30 dBi nominal mid-band gain and a typical VSWR of 1.25.

APPLICATIONS

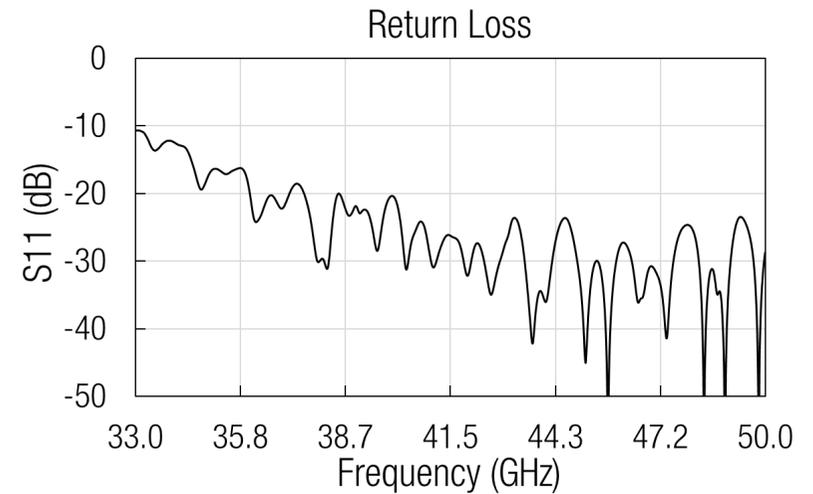

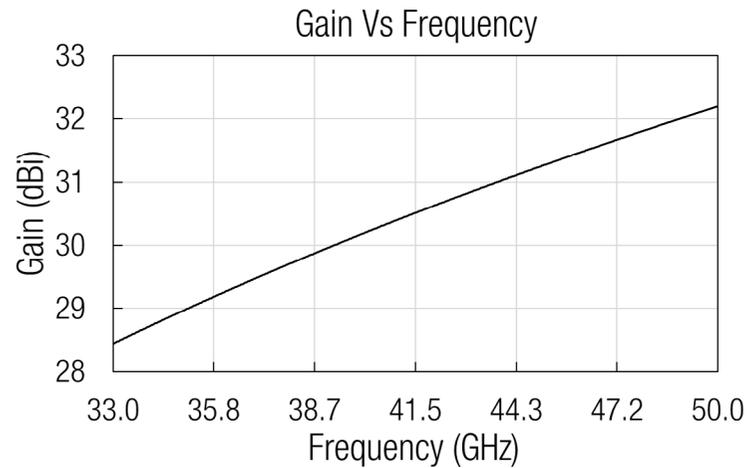

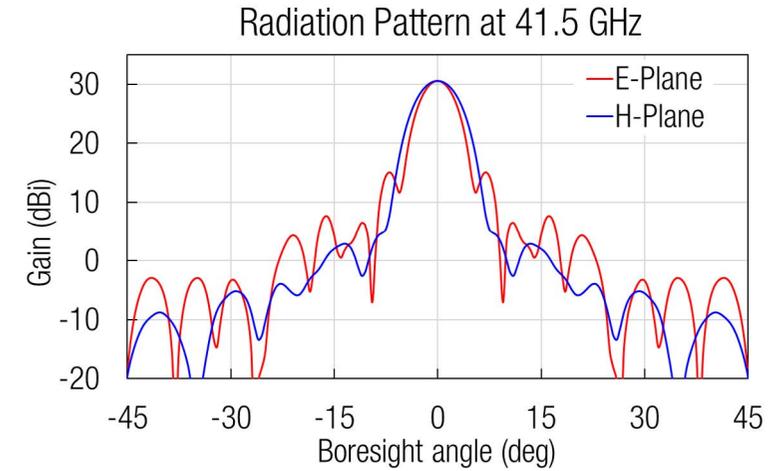

Lens Horn Antennas are especially useful when high gain is required with the minimum size. Therefore, these antennas are widely used in radar applications, communication links and meteorological systems among others.

Anteral also offers their **Focusing Lens Horn Antennas** with double-convex lenses to exhibit very well define focusing beams with short focal distances which makes them optimal for testing and material characterization.

ELECTRICAL SPECIFICATIONS

Parameter	Typical value
Frequency	33 - 50 GHz
Gain	30.5 dBi
3 dB Beamwidth, E-plane	4.8 deg
3 dB Beamwidth, H-plane	5.9 deg
Sidelobe, E-plane	-15 dB
Sidelobe, H-plane	-26 dB
S11	-18 dB

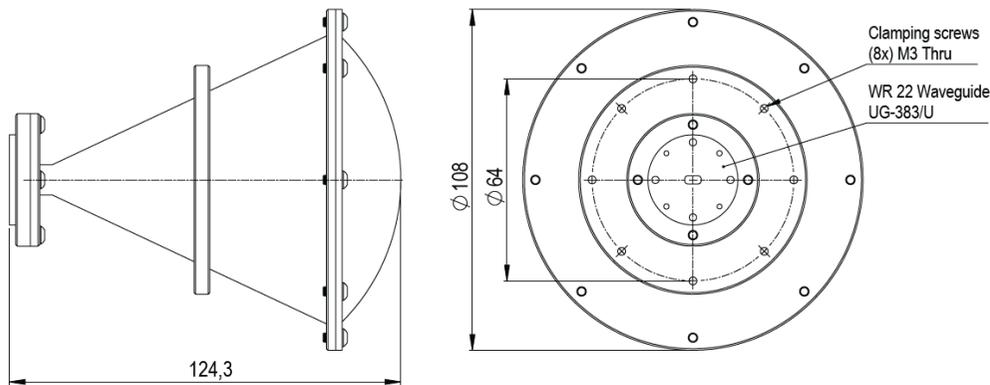

MECHANICAL SPECIFICATIONS

Parameter	Description
Antenna Port*	WR-22 (5.690 mm x 2.845 mm)
Flange	UG-383/U
Total length	124.3 mm
Total diameter	108 mm
Total weight	320 g
Horn Material	Aluminum
Lens Material	PTFE
External Color	Ruby Red

*The antenna includes a rectangular to circular waveguide transition (WR-22 to WC-380)

MECHANICAL OUTLINE

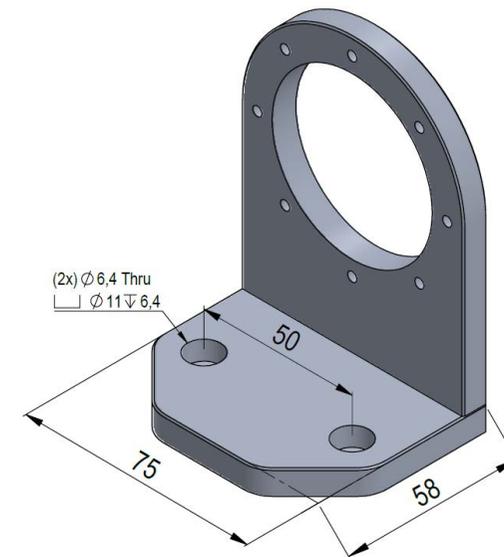

CLAMPING STRUCTURE

Anteral's Lens Horn Antennas are drilled with some threads for clamping purpose. See the mechanical outline. Anteral also offers clamping structure for the LHA-30-WR28 with the following specifications.

Model	Material	Weight (g)
LHA-30-WR22-CLAMP	Aluminum	170

*The base is drilled with 2 through holes but any custom holes can be added.

Additional notes

Gain, radiation pattern and return loss data are simulated. Actual values could vary slightly.
The return loss performance of all items is checked before delivery.
