

Near Field Probe

330 to 500 GHz, WR2.2

DESCRIPTION

The NFP-15-WR2.2 is a high-performance open-ended waveguide probe that operates between 330 and 500 GHz. It is manufactured in split-block configuration by high accurate manufacturing processes. The sharp edge is converted to a conical shape to scatter reflections.

All NFPs can include adequate absorber material to reduce backscattering reflections from flanges.

APPLICATIONS

This type of horns is especially suitable for laboratory test measurements, electromagnetic measurements and gain calibration. Moreover, custom bands and gain values can be requested.

Anteral also offers their **CATR** (Compact Antennas Test Range) for measuring large antennas at significant short ranges in antenna test facilities.

ELECTRICAL SPECIFICATIONS

Parameter	Minimum	Typical	Maximum
Frequency	330 GHz	415 GHz	500 GHz
Gain		7.5 dBi	
S11		-13 dB	

MECHANICAL SPECIFICATIONS

Parameter	Description
Antenna Port	WR-2.2 (0.570 mm x 0.285 mm)
Flange	UG-387/U
Total length	15 mm
Horn Material	Aluminum

MECHANICAL OUTLINE

Additional notes

The return loss performance of all items is checked before delivery.
