

# Trihedral Corner Reflector

62 mm length

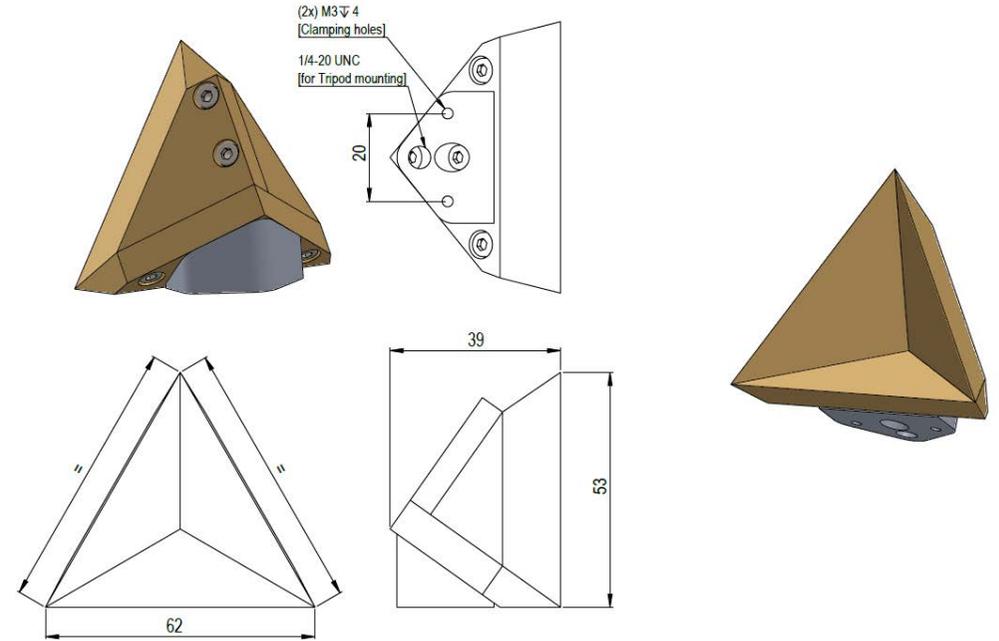

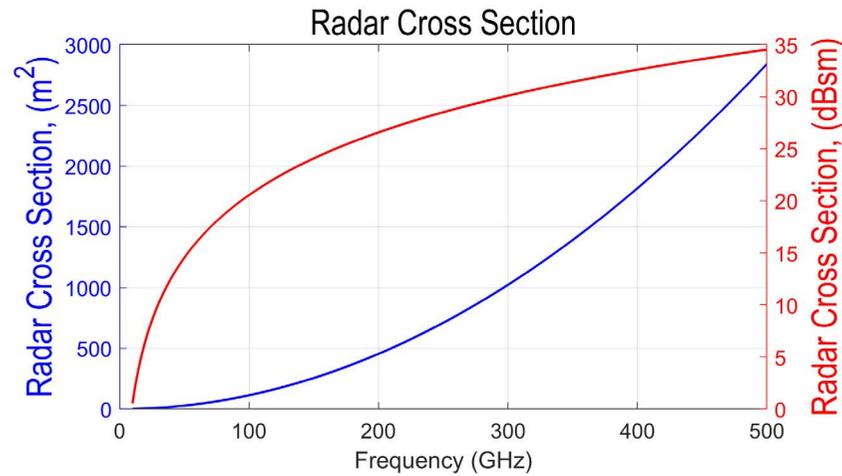

## DESCRIPTION

Anteral's triangular trihedral reflectors (TTCRs) are used for simulating radar target precisely and radar system calibration. The TTCR-62 is a 62-mm length trihedral reflector fabricated in aluminum with a gold chemical film finish. The TTCR can be easily mounted onto a tripod for rapid system setup thanks to the mounting bracket with four M3 threaded holes but any custom holes can be added.

## APPLICATIONS

Anteral's triangular trihedral reflectors (TTCRs) are used for simulating radar target precisely and radar system calibration and radar system calibration.

### RADAR CROSS SECTION AND RELATIVE MAGNITUDE

### MECHANICAL OUTLINE

Edge length	62 mm
Size	62 x 53 x 39 mm
Weight	68 g
Material	Aluminum
Finish	Gold chemical film
Mounting	2 x M3 clamping holes*

\* The base is drilled with 2 through holes but any custom holes can be added.

### Additional notes

All data are simulated. Actual values could vary slightly.
